

How to insert your foam into your new cushion covers

Here is the trick I always use to insert foam into cushion covers. Simply insert each end of your cushion cover into a plastic trash bag; then tape around the middle to keep them attached. This makes them nice and slippery . . . and you can easily slide it into your cushion cover (sometimes it also helps to bend the foam into a "U" shape while inserting). Next: tear the trash bag and pull it out, leaving just the foam inside. All done!
